**Subject:** [Non-DoD Source] Pre-Draft Work Plan  
**Attachments:** Pre-Draft HPNS Rad Work Plan\_020518.docx

Attached is the latest Word version of the work plan for review by the Navy. If there are major issues for discussion, we can have a conference call Tuesday afternoon. All comments are due to Scott Hay before 8 am pacific on Wednesday February 7.

There were major changes to Sections 4, 5, and 6 to reflect the changes made to the process flow chart during our meetings last week. However, these changes do not significantly impact the activity and MDC calculations that were moved from Section 7 to Section 5. Almost all of the text in Section 6 is new, and may focus too much on soil and not enough on building data evaluation.

There are comments included with this file indicating where work on figures and some questions on air monitoring are ongoing. Any changes to these figures and sections are for accuracy and based on previous comments received from the Navy.

Danielle will provide some additional text to be included in what is now Section 12 (previously Section 15).

If there are any questions, please contact me.

**Scott Hay | Principal Health Physicist**
